

Datasheet: SkamoWall Smooth Plaster

The SkamoWall Smooth Plaster joint compound is ready-to-use uniform, white mineral mass designed to be applied on SkamoWall Board. The product is designed to prepare surfaces of walls insulated with SkamoWall Board, to be applied under plaster or before painting.

The obtained surface is flexible, easy to polish, has excellent smoothness and is characterized by high water vapour permeability. The mass should be applied with the use of a trowel.

Grade	Value	Unit
Absorption of water	0.20 ± 0.05	kg/m ² min ^{0.5}
Thermal conductivity (average tabular value.; P=50%) (λ10,dry)	0.47	W/mK
Water vapor transmission coefficient (tabular value) (μ)	15/35	
Chloride content	0.008	% weight
Classification reaction to fire	Class A1	
HS Tariff number (Harmonized Commodity Description and Coding System)	2824.50.90	
Colour	White	

Data are average results of tests conducted under standard procedures and are subject to variation.

Data contained in this data sheet are supplied in good faith as a technical service and are subject to change without notice. Misprint and errors excepted.
